How to be a manly man

YOUNG MAN!

You have exceeded the limit allowed by nature in the enjoyment of worldly pleasures. You have at some time overtaxed your nervous system, and there is a weakness lurking there, ready to break forth in all its pitiable, destructive effects upon you. Do not disregard these little symptoms, which you feel from day to day; they are messages telling of the suffering of your nerves, and warning you that a break-down is near. It may come tomorrow, and then it will be too late to mend.

Mend now. What energy is left you, put it forth and save yourself. Call on or write to Dr. Sanden and study his plan. Study how so many unfortunates have been saved. Don't wait; act today. It is of vital importance to you.

Have you read or heard of the wonderful cures which are being accomplished by

Dr. Sanden's Electric Belt

There is not a hamlet on the Pacific coast but has one or more who owe their happiness to it. This is the record of five years of good work.

"Belt has proved entirely satisfactory; my appetite is great, digestion good, memory improving, muscles hard and strong, bowels in good order, sexual strength improving, great increase of confidence. Can do more work with greater ease than I ever have done before."—R. B. DOUGLAS, Stamwood, Wash., March 11, 1897.

What a record this paper could show if people cured of such troubles would allow their names to be used! Every day some grateful, restored man gives thanks to Dr. Sanden's Electric Belt. So will you if you try it.

Send for the book, "Three Classes of Men," free, sealed closely, by mail. Call or address

SANDEN ELECTRIC BELT CO., 253 West Washington St., Portland, Or.

When writing to Advertiser please mention this paper.

Devices are not the same as drugs

Dr Strangelove loves the bomb

Menaflex meets Devicegate meets 21st Century Cures

The background of the entire image is a collage of vintage medical instrument illustrations. At the top, there are various tools like scalpels, probes, and forceps, some labeled with 'Fig. 68' and 'A'. In the center, a large, detailed illustration of a surgical table is shown, labeled 'Fig. 91'. To the right of the table, there are more instruments, including a large vertical one labeled 'Fig. 77' and several smaller ones. The bottom right corner shows a pair of forceps and a long, thin instrument. The overall style is that of a technical manual or a historical medical catalog.

THE DANGER WITHIN US

AMERICA'S UNTESTED, UNREGULATED MEDICAL DEVICE INDUSTRY
AND ONE MAN'S BATTLE TO SURVIVE IT
